

Paramount Dental Studio Next Level Digital Lab Work

www.paramountdentalstudio.com

Leaders in digital dentistry

Paramount Dental Studio is the fastest-growing, independent, national dental laboratory in the USA. We specialize in the latest digital production methods and are at the forefront of dental innovation. Paramount Dental Studio serves doctors across the country with premium quality, the fastest turnaround, and fair pricing that only digital technology can provide.

Since 1981, we craft the most aesthetic and reliable dental prosthetics in the US. We believe that there is beauty to functionality.

Proudly made in the USA

"We are extremely proud of what we have built at Paramount Dental Studio and the exciting new avenues we are exploring in digital dentistry. In 1981, my dad ventured out on his own to pursue his passion of being excellent in his craft. Today, we have a few more team members, including one of the largest veteran workforces in the dental lab world. It is thanks to their expertise, talent and dedication that we have built one of the premier dental laboratories, delivering aesthetic, authentic and American-made restorations at competitive prices. Part of what makes our journey so exciting is that we are constantly looking to innovate - our digital design process is second-to-none, and we are now exploring ways to integrate artificial intelligence to ever improve dental designs and lab work flow. We are dental explorers and we would love to share this journey with you."

Philip Kim
Head Lab Tech
Combat-veteran
US Army

"I have been with Paramount for years now because of their consistently excellent work and phenomenal customer service. I rarely see a dental lab that is so invested in perfecting their products and services. I love working with them because they really make my work easier!"

— Kyle Stanley, DDS, partner at Helm Nejad Stanley & Adjunct Faculty, Herman Ostrow School of Dentistry at USC

"Don't be fooled by Paramount's competitive pricing, you will get quality results for both your posterior and anterior cases. Their turnaround is dependable. Their communication is excellent. Paramount Dental Studio is becoming my first choice for just about all of my ceramic crowns. I recommend them any chance I get."

— Pete Appleby, DDS, Richmond VA

Services that make a difference

Everything we fabricate is 100% designed and manufactured in Huntington Beach, Southern California. Paramount Dental Studio is a certified Veterans Affairs job-training site, combat-veteran-owned and proud to employ a large number of veterans in its work force.

Authentic materials

Whether it is Ivoclar attesting to our use of authentic E.max or Zimmer 3i milling your abutment from originally manufactured parts, you can always verify that you are receiving authentic materials that meet the promised specifications.

Implant Integrity

Our abutments are fabricated by the implant manufacturer

Increased warranty, better fit, reduced failures

Compatibility with Zimmer, 3i, Nobel, Straumann, BioHorizons, Atlantis and more ...

Turnaround

Scan Monday, delivered Thursday (digital zirconia cases)

Warranty

7 year warranty

At the forefront of innovation

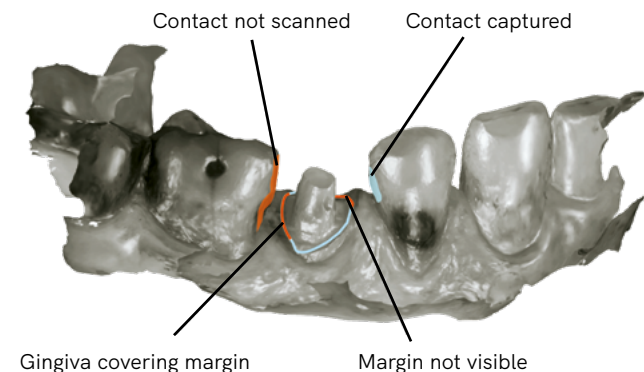

Smile Design expertise

Smile Design increases case acceptance because your patients can try out their new smile before committing to the final restoration. Using the latest digital design technology, our in-house designers in California will take the patient's overall facial features - the lip line, the facial midline, etc. - into account to craft the most aesthetic smile. Hundreds of happy patients are testimony to the success of Paramount's Smile Design.

Supporting American innovation

Paramount Dental Studio partners with Pearl Inc. - dentistry's first and only artificial intelligence company. Paramount leads research and development on the laboratory side of Pearl's Margin Marking software. The program views a scan of a prepped tooth and automatically detects the margin. This software will help create faster designs with a superior quality and fewer margin errors.

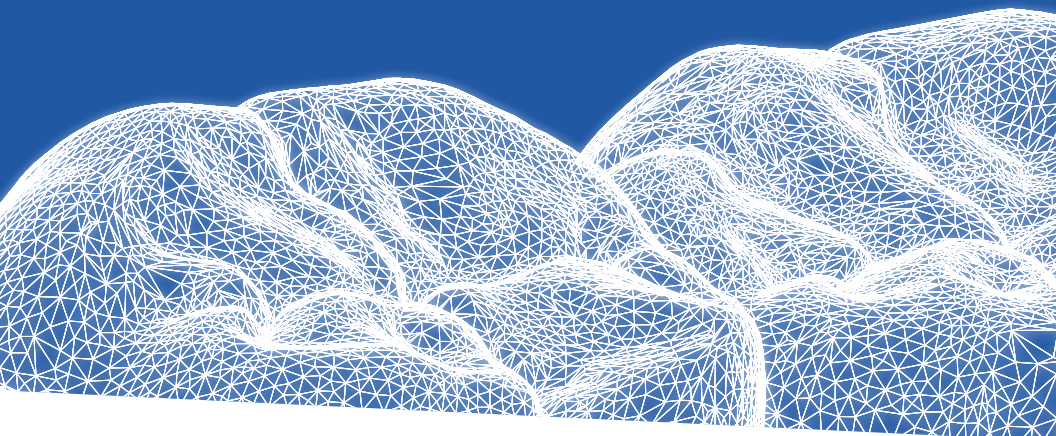

"Paramount's Smile Design is second to none. With the technology and communication tools they offer, it is predictable and always spot on."

— Kyle Stanley, DDS, partner at Helm Nejad Stanley & Adjunct Faculty, Herman Ostrow School of Dentistry at USC

"I love Paramount! I've been a dentist ten years. I've used small local labs to try and get the consistency of one tech, huge labs like Glidewell only to be frustrated by some techs being awesome and others horrible. I've used Paramount for 11 months now. I love them. Consistent results, perfect shades, great contours, perfect margins and contacts, really quick turn around times, and nothing outsourced (even labs you mail to in the USA outsource your work nowadays), but not Paramount. I've never liked one lab this long consistently."

— Davis Gardner, DDS, Richmond VA
